

OKY3464-1/LM386

DC 5V-12V LM386 Mini Micro Audio Amplifier Module

- Low static power consumption, the quiescent current of approximately 2MA, ideal for battery-powered.
- Wide operating voltage range: 4-12V.
- Very few external components.
- The board default gain of 200.
- Low distortion.
- On-board volume control potentiometer clockwise to increase the volume.
- With power indicator light.
- Board size: 41*13 mm.
