

# ViPRO I/O Alarm Box

**I/O Alarm Box** is a device designed for Mobile Digital Video Recorder, providing the I/O interface of alarm input, alarm output and speed, to realize the functions of alarm test and alarm linkage, etc.

## Key Features

- Eight alarm input interfaces, providing the alarm detection input
- Two alarm output interfaces, providing the alarm detection output
- One speed input interface, to detect speed of dashboard
- Simple wiring
- Overall aesthetic
- Easy maintenance

## Technical Specifications

Product series	I/O Alarm Box
Alarm In	Eight ( 5~30V High Level, 0~2V low level)
Alarm Out	Two, 12V@200mA
Power Output	12/2A, 5V/1A
Vehicle Speed	Pulse signal
Working Temperature	-30°C~70°C
Storage Temperature	-40°C~85°C
Relative Humidity	<95%
Wire Length	1000mm
Weight	225g
Dimension	69mm*71mm*21mm
