

## Outdoor sounders with flash

# ECO 550W

Outdoor self powered sounder with double front cover.

Sounders have strobe with tungsten or xenon flash with high visibility to easily identify the origin of the alarm.

ECO550W sounders have tamper signal for protection against wall removal and cover opening.

The electronic circuit is encapsulated in resin as protection against bad environmental conditions and increases resistance to shock and vibration.

### Main characteristics

- External housing: ABS; internal housing: galvanized steel.
- Electrostatically applied epoxy polyester paint finish
- Space to accommodate 12V-2Ah battery
- Electronic circuit encapsulated in protective resin
- Protection against reverse polarity
- In case of cutting cables or AC loss, alarm will stop only by reset from control panel
- Tamper signal indicating cover open and removal from base
- Cut-off timer
- Tungsten or xenon strobe

		ECO550W
<b>Technical specifications</b>		
Sound output max at 1m	dbA	117
Frequency of flashing	Hz	1
Voltage	V	12
Commande		Positive/negative
Current consumption Stand-by	microA	70
Alarm Siren Xenon Tungsten	mA	950 150 300
Battery		12V, 2Ah
<b>Characteristic</b>		
Dimensions	mm	228x196x75
Operating temperature	°C	-25/+70
Weight	kg	2.2
