

Outdoor sounders with flash

ECO700W

Outdoor self powered sounder.

Sounders have strobe with tungsten or xenon flash with high visibility to easily identify the origin of the alarm.

ECO700W sounders have tamper for protection against wall removal and cover opening.

The electronic circuit is encapsulated in protective resin as protection against bad environmental conditions and increases resistance to shock and vibration.

Main characteristics

- External housing: ABS; internal housing: galvanized steel.
- Space to accommodate 12V–2Ah battery
- Electronic circuit encapsulated in protective resin
- Lens colour: orange
- Protection against reverse polarity
- Tamper signal indicating cover open and removal from base
- Tungsten or xenon strobe
- In case of cutting cables or AC loss, alarm will stop only by reset from control panel
- IP43 protection

		ECO700W
Technical specifications		
Sound output max at 1m	dbA	117
Frequency of flashing	Hz	1
Voltage	V	12
Control circuit current	mA	1
Current consumption Stand-by	microA	8
Alarm:		
Siren	mA	950
Xenon		100
Tungsten		300
Battery		12V, 2Ah
Characteristic		
Dimensions	mm	240x315x88
Operating temperature	°C	-25/+65
Weight	kg	3.4
